## About Me

What's up dear Reader! I'm Vijay Gowda, a web designer and a front end developer. I'm constantly learning about latest and best web technologies and other design related topics, currently playing around with Angular. Some of my skills include: HTML5, CSS3, SCSS, Responsive Web Design Bootstrap, Photoshop, basic knowledge of Javascript & jQuery.

Design Process - It always starts with a pencil and paper, scribbling ideas and concepts, thinking about the problem and the solution. Once I have an idea of what I want to achieve, I'll then sit down at my computer and start with the mockups. Then convert the mockup to html pages. I use SCSS - a CSS extension.
