About Me

I'm Vijay Gowda, a web designer and front-end developer. I'm constantly learning web technologies and other design related topics, currently playing around with Angular. Some of my skills include:
HTML5
CSS3
SCSS
Responsive Web Design
Bootstrap 4
Adobe Photoshop
Adobe XD
Adobe Illustration
Ionic Html Tags
Basic knowledge of JavaScript & jQuery.

Design Process - It always starts with a pencil and paper, scribbling ideas and concepts, thinking about the problem and the solution. Once I have an idea of what I want to achieve, I'll then sit down at my computer and start with the mockups. Then convert the mockup to html pages. I use SCSS - a CSS extension.
